REMARKS:

Attached are three copies of the analysis of NVA pre-offensive dispositions which you requested on 4 October. This memorandum with its accompanying map is a refinement of the quick first cut at the problem done on 4 October to meet your immediate needs. Our thorough, slightly less hurried review of all available evidence led us to make some minor adjustments with respect to certain individual NVA units. The revisions of our 4 October submission, however, all deal with specific points of detail. They do not in any way materially alter the general picture presented in our initial response to your request.
